Month	Name of Chapter	Objective / Aim	Enrichment Activity
April	CH- Matter in our surroundings	The students will be able to understand the Characteristics of matter, types of matter, Change of state and evaporation.	To perform and observe the various types of reactions.
	CH- Cell: The fundamental unit of life	The students will be able to understand the functions of different cell organelles in a cell, and the types of cell division.	To prepare temporary mount of onion peel and human Cheek cell.
	CH--Motion	The students will be able to know the types of motion, distance, displacement, equation of motion, graphical analysis	To find the distance and displacement covered by an object
May	CH- Cell the fundamental unit of life(contd).	Students will be able to differentiate between animal cells and plant cells. Students understand prokaryotic and eukaryotic cells.	
	CH- Motion (Contd)	The students will be able to know the types of motion, distance, displacement, equation of motion.	
July	CH-- Is matter around us pure?	The students will be able to Classify the different types of matter found around us into elements, compounds and mixture. Students will understand about homogenous and heterogeneous mixture, colloids different types of colloids and their example from daily life, their properties shown. Students can differentiate amongst the homogenous, heterogeneous and colloids. Understand the concept of Tyndall effect. Students will understand the definition of tissue.	To prepare a mixture and compound using iron fillings and Sulphur powder and distinguish between these on the basis of appearance, behavior towards magnet, behavior towards carbon disulphide as a solvent and effect of heat.
	CH- Tissues	Plant tissue – their types, Function of each type, their location.	To separate the components of a mixture of sand, common salt, and ammonium Chloride
	CH – Force and Law of motion	The student will be able to know about the force and motion, Newton’s laws of motion and its applications, inertia, and mass, momentum. Conservation of momentum, action, and reaction.	To verify the Newtons third law of motion.
August	CH- Tissue (contd)	Animal cell – its types, function of each type, their location, and features.	Identification of tissue by prepared slides of plant and animal.
	CH- Forces and laws of motion (contd.)	Numerical, graphical study, HOTS based questions.	Nerve cell and draw their diagram.
September	Revision and Half Yearly		

October	CH- Atoms and molecules CH- Gravitation CH-Improvement in food resources	The students will be able to study the Characteristics of atoms and molecules and also study the concept of mole concept The student will be able to know about the universal law of gravitation, gravity, mass and weight, free fall. Student will learn methods for Improvement of crop variety.	To determine the density of solid by using a spring balance and a measuring cylinder.
November	CH-Improvement in food resources(contd) CH- Gravitation (Cont..)	Improvement in crop production. Properly managing crop protection.	Calculate the loss in weight of solid. i. Tap water. ii. Salty water
December	CH – Structure of atom CH- Work and energy	Student will learn the different theories for structure of atom – Their postulates and limitations. The student will be able to know about the work, energy, power, kinetic and potential energy, law of conservation of energy	To calculate the electricity bill of a house
January	CH- Sound CH – Structure of atom (contd.)	The student will be able to know about the nature of sound, speed of sound, range of hearing in human, ultrasound, reflection of sound, echo and structure of human ear. Students will learn electronic configuration and valency.	To verify the laws of reflection of sound
