

<u>SUBJECT – ENGLISH CORE</u>

Month	Section	Content	Objectives/Aims	
April & May		Bridge course	To prepare students for advanced studies	
July	Reading	Passages for Note Making & Summary Writing	To develop the skill of making notes and summarizing	
	Writing	Classified Ads	To convey needs and requirements in concise and precise way	
		Speech & Debate	To present ideas on a given issue in a convincing way.	
	Grammar	Error Correction	To develop the ability to write flawless language	
	Literature	L-The Portrait of a Lady	To point out relevance of strong relationship with elders	
		S - The Summer of a Beautiful White Horse	To know that essential goodness in a human being remains intact	
		P- A Photograph	To understand the transient nature of human life.	
		P- The Tale of Melon	To point out that misuse of power and lack of wisdom	
		City	result in catastrophic situation.	
August	Reading	Passages for Note Making	To develop the skill of making notes and summarizing	
	Writing	Classified ads	To convey needs and requirements in concise and precise way	
		Posters	To present topics of educational and social relevance aesthetically.	
	Grammar	Jumbled Words	To develop confidence and proficiency in the use of language skills	
	Literature	L- We're Not Afraid to Die	To appreciate the importance of courage and determination in adverse circumstances.	
		P - The Laburnum Top	To emphasis the phenomena of transfer of energy present in nature	
		P - Voice of the Rain S - The Address	To appreciate the bounties of nature in the form of rain. To explain the impact of war.	
September	Reading	Passages for	To build confidence regarding concept clarity along	
September	Reading	Comprehension &	with vocabulary enhancement	
		Note Making	To develop the skill of making notes and summarizing	
	Writing	Classified Advertisements	To convey needs and requirements in concise and precise way	
	Grammar	Editing Tasks	To develop the ability to identify the mistakes and correct them	
	Literature	L - Discovering Tut- The Saga Continues	To point out the contribution of technology in studying past.	
October	Reading	Passages for Note Making (practice)	To develop the skill of making notes and summarizing	
	Writing	Speech & Debate	To present ideas on a given issue in a convincing way.	
	Grammar	Error Correction	to use different grammatical structures in appropriate contexts.	
	Literature	P - Childhood	To know the constraints of adult life.	
		S-Mother's Day	to focus on the dignity of mother.	

November	Reading	Passages for Comprehension (practice)	To build confidence regarding concept clarity along with vocabulary enhancement
	Writing	Speech & Debate Posters	To present ideas on a given issue in a convincing way.To present topics of educational and social relevance aesthetically.
	Grammar	Omission	To develop confidence and proficiency in the use of language skills
	Literature	P-Father to Son	To point out changing relationship between parents and children.
		L - The Adventure	To acquaint with the genre of time travel
December	Reading	Revision & Practice	To develop confidence and proficiency in the use of language skills
	Writing	Revision & Practice	To prepare students for writing in an impressive style
	Grammar	Revision & Practice	To develop confidence and proficiency in the use of language skills
	Literature	L - The Silk Road	To develop a liking for reading travelogues
		S - Birth	To know that persistent efforts bring result.
January & February		Revision	To develop confidence and proficiency in the use of language skills

SUBJECT – PHYSICS

Month	Name of the Chapter	Learning Objective/ Learning Outcomes	Practical / Activities
April	Ch-2 Units and Measurements	To learn the proper way to express the results of calculations and measurements including the appropriate dimensions.	Ex.1. Diameter of small spherical body by Vernier Calipers.
	Ch-3 Motion in a straight line	To study the motion of objects, calculation of the distance.	Act.1. To make paper scale of given L.C. 0.2 cm.
May	Ch-4 Motion in a plane	To analyze the tracks of elementary particles in two dimensions.	Ex.2. Diameter of small cylindrical body by Vernier Calipers.
July	Ch-5 Laws of Motion	To study Newton's laws of classical mechanics which form the basis of our understanding of motion and its causes.	Ex.3. Diameter of a wire by using screw gauge.
	Ch-6 Work, Energy & Power	To discuss energy in a more comprehensive way and generalize the law of conservation of energy which is one of the most useful laws of Physics.	Act.2. To make paper scale of given L.C. 0.5 cm.
August	Ch-7 Systems of Particles and Rotation Ch-8 Gravitation	To show that Newtons laws can be used to describe the motion of the center of mass of a complex system. To consider the general motion of a rigid body and to describe the rotation with appropriate variables and relating them to one another. To study the gravitational force and the law that describes the force, controls the structure, the development, and the eventual fate of the universe.	Ex.4. Thickness of a given sheet using screw gauge.Ex. 5. Mass of two different objects using beam balance.
September	Revision, Half Yearly exam	8	
October	Ch-9 Mechanical properties of solids Ch-10 Mechanical properties of fluids	To study the properties of solids. To study the properties of fluids and the laws that govern them.	Ex.6.Weight of a given body using parallelogram law of vectors. Act.3. Variation of range of jet of water with angle of projection.
November	Ch-11 Thermal properties of matter Ch-12 Thermodynamics	To study the properties of matter due to transfer of heat. To discuss internal energy and another method for changing the energy of system.	Ex.7.Force constant of a helical spring. Ex.8.To plot L-T, L-T ² graph using simple pendulum. Act.4. To plot cooling curve of molten wax.
December	Ch-13 Kinetic Theory of Gases	To take a microscopic approach and seek to account for the macroscopic	Ex.9.Coefficient of viscosity of a viscous liquid.

	Ch-14 Oscillations	properties of a gas in terms of the properties of its molecules. To understand the concepts of SHM and its applications.	Ex.10. To study the relationship between a hot body and time by plotting a cooling curve. Act.5. Effect of heating on a bi-metallic strip.
January	Ch- 15 Waves	To study waves and the principles applicable on it.	Act.6. Factors affecting the rate of loss of heat of a liquid. Revision
February	Revision		

Unit Test I	Half Yearly	Unit Test II	Qualifying	Annual
Ch: 2, 3 & 4	Ch: 2 to 6	Ch: 9 & 10	Ch: 2 to 10	Ch: 2 to 15

SUBJECT – CHEMISTRY

Month	Name of the Chapter	Learning Objective/ Learning Outcomes	Practical / Activities	
April	Ch-1 Some basic concept of chemistry	To understand mole concepts of chemistry.	Salt Analysis (gr 0)	
May	Chapter 3. Periodic classification of element.	Periodicity. Filling of electrons in atomic orbitals.	Salt Analysis (gr 1)	
July	Ch-2 Structure of Atom	Different models of atoms and shapes of orbital.	Salt analysis (Gp-2)	
August	Ch-4 Chemical Bonding Ch-6 Thermodynamics	To learn theories of bonding, Laws of thermodynamics, Entropy	Titration and core experiments	
September	Revision Half Yearly examinations			
October	Ch-7 Equilibrium Ch-8 Redox Reactions	To learn types of equilibrium, Acid and base concepts, Common ion effect. To learn balancing of Redox reactions, EMF of cell.	Salt analysis (Gp-3)	
November	Ch-12 Organic Chemistry- Gen. Principles and properties	IUPAC naming and effects. Qualitative and quantitative analysis.	Salt analysis (Gp-4)	
December	Ch-13 Hydrocarbons	To learn prop. of alkanes, alkene, alkynes.	Salt analysis (Gp-5,6)	
January	Ch-13 Hydrocarbons	To learn prop. of aromatic hydrocarbon.	Revision	
February	Revision			

Unit Test I	Half Yearly	Unit Test II	Qualifying	Annual
Ch: 1, 2	Ch: 1, 2, 3, 4, 6	Ch: 7, 8	Ch: 1 to 8	Complete Syllabus

<u>SUBJECT – BIOLOGY</u>

Month	Name of Chapter	Objective/Aim	Lab Activity
April	Ch-1 The living world	To make students understand and differentiate between Living and Non- living organism, classify different Living organism on the basis of hierarchy, familiarize with different Taxonomical Aids like Herbarium, botanical garden, Zoological Museum and facilitate.	 To observe a video on various taxonomical aids Group discussion on how these aids are helpful for biology students. 3.Classifying organisms on the basis of hierarchy
	Ch-2 Biological Classification	Understand and describe about two, three, four, five kingdom classification. Understand and explain systematics under four heads- identification, classification Nomenclature, Taxonomy. Explain and comprehend the characteristic features of different kingdom.	 1.To study different parts of microscope and its working 2.To observe different slides of the kingdom monera and protista and comment on it 3.To observe different specimens and slides of kingdom Fungi and comment on it
May	Ch-3 Plant Kingdom	Classify and describe plant kingdom under different divisions – thalophyta, brophyta, pteridophyta, gymnosperm and angiosperm.	 To observe the different specimens of plant kingdom and comment on it Spotting- To identify the given organism, classify, draw and write its significant characteristics
	Ch-8 Cell: Structure and Function	To make them comprehend and to connect with the earlier understanding s about the cell and its organelle.	To observe the structure of cell
July	Ch-8 Cell: Structure and Function	Cell theory and its different Discoveries and inventions of Cell, differentiate between prokaryotic and eukaryotic; unicellular and multicellular.	Study of distribution of stomata on the upper and lower surfaces of leaves. Comparative study of the rates of transpiration in the upper and lower surfaces of leaves.
	Ch-4 Animal kingdom	Students will be able to learn, understand the concept and classify Animal kingdom under different phylum porifera, cnidaria, ctenophore, platyhelminthes, aschelminthes, annelid, mollusca, arthropoda, echinodermata, chordata.	 To observe the different specimens of animal kingdom and comment on it . Spotting- To identify the given organism, classify, draw and write its significant characteristics

August	Ch-5 Morphology of flowering plants	Enable the students to know and understand the morphology & modifications Root, Stem, leaf, Inflorescence, Flower, Parts of a flower, Fruit, Seed, Structure of dicot & monocotyledonous seed. Students will be able to understand & describe a flower parts, writes floral formula with floral diagrams.	Study and describe locally available common flowering plants, from family Solanaceae (Poaceae, Asteraceae or Brassicaceae can be substituted in case of particular geographical location) including dissection and display of floral whorls, anther and ovary to show number of chambers (floral formulae and floral diagrams), type of root (tap and adventitious); type of stem (herbaceous and woody); leaf (arrangement, shape, venation, simple and compound).		
	Ch-6 Anatomy of flowering plants	To provide students with knowledge of the tissues, meristematic and permanent tissues, monocotyledonous and dicotyledonous plants, secondary growth in plants monocotyledonous and dicotyledonous plants, secondary growth in plants.	Preparation and study of T.S. of dicot and monocot roots and stems (primary).		
	Ch-7 Structural organisation in animals	Students will be able to understand Morphology, Anatomy and functions of different systems (digestive, circulatory, respiratory, nervous and reproductive) of frog.	To observe the structure of frog through specimen.		
September	HALF YEARLY EXAMINATION				
October	Ch-9 Biomolecules	To make them understand about the primary and Secondary metabolites. To make them understand about the structure and function of different Bio macromolecules and enzymes.	To prove heat destroys the activity of enzymes and not the catalyst. To prove that change of pH inhibits the enzyme activity. To test for the presence of sugar, starch, proteins and fats in suitable plant and animal materials.		
2	Ch-10 Cell Cycle and Cell Division	To explain the importance of cell division To make them understand about the various stages of Mitosis in cell and relate with various examples of cell	 To observe the different stages of meiosis through permanent slides To prepare the onion root tip slide and to observe different stages of mitosis. 		

		division Differentiate between amitosis and mitosis To make them understand the various phases of meiotic cell division of Meiosis I & II and relate it with the gamete formation in gonads.	
	Ch-11 Photosynthesis in Higher Plants	To make them understand update with the Early Experiments To explain and make them understand the structure of chloroplast where Light reaction takes place, mechanism of Light reaction, aware and understand about Electron Transport System	 1.To observe the effect of light in photosynthesis 2.To observe the stomata in the lower and upper epidermis of leaf and find the stomatal index 3.To detect the formation of starch in different leaves 4.To prove the presence of chlorophyll by paper chromatography
November	Ch- 12 Respiration in plants	To make them differentiate between Fermentation/Anaerobic and Aerobic respiration	 1.To compare the rate of respiration in germinating seeds (carbohydrate, proteins and fats) 2. To prove anaerobic respiration takes place in yeast.(alcohol fermentation) 3. To prove CO2 is given out during respiration (aerobic)
	Ch-13 Plant - Growth and Development	To make the student understand about growth and Development, Differentiation, Dedifferentiation and Re-differentiation, Plant growth regulators and their function, differentiate between Photoperiodism and Vernalisation	 To observe phototrophism in plants To observe chemotrophism – growth of pollen tube in stigma.
	Ch-14 Breathing and Exchange of Gases	To make them understand and differentiate the concept of breathing and respiration. To educate them with the Disorders of respiratory system.	To prove lime water turns milky during exhalation.
December	Ch-15 Body Fluids and circulation	Students will know and understand all the components of human circulatory system, Mechanism of coagulation of blood, Concept of human blood group, describe circulatory pathways, describe cardiac cycle, understand electrocardiograph	
	Ch-16 Excretory products and their elimination	Students will be able to: Explain the purpose of the kidneys, bladder, and urethra	To test the presence of urea, sugar, albumin, bile salts in urine.

		Describe the excretory system Demonstrate an understanding of the path of the excretory system	
	Ch-17 Locomotion and Movement	To understand different types of bones associated with various movement, mechanism of muscle contraction Skeletal System, working of various joints, cause of different Muscular Disorders	 Study of different types of bones and cartilage of human body by models. To identify different bones of skull vertebral column, sternum, girdles, Forelimb and Hind limb from the human skeleton and comment on it. Role play of synovial joints with various day to day life activities
January	Ch-18 Neural control and Coordination	To familiarize with different parts of Neural System, study different parts of brain and their function. To explore about Reflex Action and Arc,conduction of nerve impulse with diagram. Appreciate the importance of different Endocrine glands and the hormones they secrete.	To observe sudden withdrawl of body on coming in contact with hot, cold or pointed objects, jerking of knee when hit below knee cap, Watering of mouth by seeing delicious food.
	Ch-19 Chemical Coordination and Integration	To apply the learning to determine the effect of hypo and hyper secretion of hormones from different glands.	A case study on any disease caused due to hypo or hyper hormonal imbalance in your family/neighbour.

Unit Test I	Half Yearly	Unit Test II	Qualifying	Annual
Ch: 1, 2, 8	Ch: 1, 2, 3, 4, 5, 6, 8	Ch: 7, 9, 10	Ch: 1 to 15	Complete Syllabus

<u>SUBJECT – MATHEMATICS</u>

Month	Ch. No.	Chapters Name	Learning Objectives/Outcomes	Activities
April	3	Trigonometric Function	To know trigonometric functions using unit circle, identities, formulas, and their application.	
	9	Straight Lines	To use algebra advantageously in study of straight line, their slopes and their properties.	
Мау	1	Sets	representation, Venn diagrams, operations on	To verify operations on sets using venn diagrams.
July	2	Relations And Functions	relations, functions, domain, co-domain,	To find the no. of relations from set A to B.
	4	Complex Numbers & Quadratic Equations	To make clear about complex numbers and real numbers, operations on complex numbers and multiplicative Inverse, conjugate, modulus, and their properties.	To differentiate between function and relation.
August	5	Linear Inequalities	1 57 6	To find out the solution of linear inequations graphically
	6	Permutations & Combinations	To understand the concept of fundamental principle of counting, factorial notation, permutations and combination and their properties with daily life examples	
September	7	Binomial Theorem		To construct a pascal triangle and to write binomial expansion for a given positive integer power
	Revi	sion For Half Yearly	Exams	
October	8	Sequences And Series	To Know about the sequence, Arithmetic and geometric progressions.	
November	10	Conic Section	To learn about the intersection of a plane with a double napped cone right circular cone results in different types of the curve.	To construct an ellipse
	11	Three Dimensional Geo.	To extend the knowledge of two- dimensional geometry to three- dimensional geometry.	
December	12	Limits & Derivatives	To find out the limits and derivatives of different functions	
January	13	Statistics	To learn about the important measures of dispersion and their methods of calculation for ungrouped and grouped data.	

	14	Probability	To know about the basic terms, for random	To find the sample
			experiments with different cases to interpret	space of (i) dices (ii)
			the probability.	coins.
February	Revis	ion		

Unit Test I	Half Yearly	Unit Test II	Qualifying	Annual
Ch: 1, 3, 9	Ch: 1, 2, 3, 4, 5, 6,	Ch: 8, 10	Ch: 3, 4, 5, 6, 7, 8,	Complete Syllabus
	7,9		10, 11, 12	

SUBJECT – COMPUTER SCIENCE WITH PYTHON

Month	Chapter	Objective / Aim	Lab Activity
	Name	~~ j ~~~~	
April	Ch – 1 Computer System Organization	Description of a computer system and mobile system, CPU, memory, hard disk, I/O, Types of software, OS, utility, libraries, Language of Bits: bit, byte, MB, GB, TB, and PB. Execution of a program, Interpreters, Compiler and an interpreter, how an operating system runs a program, idea of loading, operating system as a resource manager, Concept of cloud computers, cloud storage (public/private), and brief introduction to parallel computing.	 Introduction to Python environment Interactive Mode Script Mode Operators & Operands
May	Ch – 2 Data Representation & Boolean Logic	Information representation: numbers in base 2, 8, 16, unsigned integers, binary addition, Strings: ASCII, UTF8, UTF32, ISCII (Indian script code), Boolean logic: OR, AND, NAND, NOR, XOR, NOT, truth tables, De Morgan's laws	 Basic Programs of Python: Add 2 numbers. Make a simple calculator. Calculate total & percentage of a student.
July	Ch – 3 Computational Thinking & Getting Started with Python Ch –4 Python	Introduction to problem solving, Steps for problem solving, Algorithms, Flowcharts, Pseudocode, computational thinking & its components, Familiarization with the basics of Python, features, advantages, disadvantages, how to install python, Python IDLE, Exiting Python. Variables, Multiple assignments,	 Basic Programs of Python: Swap the values of two variables. Conversion of Celsius to Fahrenheit & vice -versa. Conversion of units of measurement.
	Programming Fundamentals	Keywords, expressions, Operators & its types, User Defined Functions, Indentation, Tokens, Comments process of writing a program, running it, and print statements; simple datatypes: integer, float, string	 Basic Programs of Python: To calculate the area & perimeter of various shapes. Conversion from amount-in-dollars and dollar-to-rupee.
August	Ch – 5 Conditional & Looping Constructs Ch – 6 Strings in Python	Conditional statements: if, if-else, if-elif- else; simple programs: e.g.: absolute value, sort 3 numbers, and divisibility. Notion of iterative computation and control flow: for, while, Nested loop, jump Statements- break, continue & pass. Strings: compare, concatenation, substring; various string operations & functions.	 Basic Programs of Python: Print numbers from 1 to 100. Print the table of a given number. Check for Palindrome, Armstrong number. Print Fibonacci Series Basic Programs of Python: Reverse a string. Check whether a string is palindrome or not. Count the occurrence of a character in a string.

September		Half Yearly Examinations						
October	Ch – 7 Lists in Python Ch – 8 Tuples and Dictionary	Lists: finding the maximum, minimum, mean; linear search on list/tuple of numbers, and counting the frequency of elements in a list using a dictionary. Introduce the notion of accessing elements in a collection using numbers and names. Tuples and dictionary: finding the maximum, minimum, mean; linear search on list/tuple of numbers, and counting the frequency of elements in a list using a dictionary. Introduce the notion of accessing elements in a collection using numbers and names.	 Basic Programs of Python: Enter elements in a list and find the sum. Find the minimum & maximum element in a list/tuple. Input a list of numbers and swap elements at the even location with the elements at the odd location. Input a list/tuple of elements, search for a given element in the list/tuple. Create a dictionary with the roll number, name and marks of n students in a class and display the names of students who have scored marks above 75. 					
November	Ch – 9 Introduction to Python Modules Ch – 10 Society, Law & Ethics	Importing module using import statement/ from statement, importing math module, random module, statistics module. Digital Footprints, Digital society & Netizen, Data Protection, Intellectual Property Rights, its violation, Cyber crime	 Basic Programs of Python: Create a module Area and define functions to find the area of circle, square, rectangle etc. Import the module and calculate the area of a shape. 					
December	Ch – 11 Cyber Safety	Cyber safety: safely browsing the web, identity protection, confidentiality, social networks, cyber trolls and bullying, Appropriate usage of social networks: spread of rumors, and common social networking sites (Twitter, LinkedIn, and Facebook) and specific usage rules, safely accessing web sites: adware, malware, viruses, Trojans, safely communicating data: secure connections, eavesdropping, phishing and identity verification, IT Act, 2000, E-Waste management.	Revision of all the programming concepts.					

Unit Test I	Half Yearly	Unit Test II	Qualifying	Annual
Ch – 1, 2 & 3	Ch – 1 to 5	Ch – 6, 7, 8	Ch – 1 to 9	Complete Syllabus

SUBJECT – INFORMATICS PRACTICES

Month	Unit Name	Chapter Name	Objective / Aim	Lab Activity
April	Unit 1: Introduct ion to Compute r System	Introduction to Computer System	Introduction to computers and computing: evolution of computing devices, components of a computer system and their interconnections, Input/Output devices. Computer Memory: Units of memory, types of memory – primary and secondary, data deletion, its recovery and related security concerns. 2 Software: purpose and types – system and application software, generic and specific purpose software.	Identify the components of the Computer System.
May	Unit 2: Introduct ion to Python	Introduction to Python	Basics of Python programming, Python interpreter - interactive and script mode, the structure of a program, indentation, identifiers, keywords, constants, variables, types of operators, precedence of operators, data types, mutable and immutable data types, statements, expressions, evaluation of expressions, comments, input and output statements, data type conversion, debugging, control statements: if-else, for loop	 To find average and grade for given marks. To find sale price of an item with given cost and discount (%). To calculate perimeter/circumference and area of shapes such as triangle, rectangle, square and circle. To calculate Simple and Compound interest. 5. To calculate profit-loss for given Cost and Sell Price. To calculate EMI for Amount, Period and Interest. To calculate tax - GST / Income Tax.
July		List	Lists: list operations - creating, initializing, traversing and manipulating lists, list methods and built-in functions.: len(), list(), append(), extend(), insert(), count(), find(), remove(), pop(), reverse(), sort(), sorted(), min(), max(), sum()	 8. To find the largest and smallest numbers in a list. 9. To find the third largest/smallest number in a list. 10. To find the sum of squares of the first 100 natural numbers. 11. To print the first 'n' multiples of given number. 12. To count the number of vowels in user entered string. 13. To print the words starting with a alphabet in a user entered string.

				print the number of occurrences of a given alphabet in each string.
August		Dictionary	Dictionary: concept of key-value pair, creating, initializing, traversing, updating and deleting elements, dictionary methods and built-in functions: len(), dict(), keys(), values(), items(), get(), update(), clear(), del()	 15. Create a dictionary to store names of states and their capitals. 16. Create a dictionary of students to store names and marks obtained in 5 subjects. 17. To print the highest and lowest values in the dictionary.
September	Half Year	y Examination	15	
October	Unit 3: Database concepts and the Structure d Query Languag e		Database Concepts: Introduction to database concepts and its need, Database Management System. Relational data model: concept of attribute, domain, tuple, relation, candidate key, primary key, alternate key, foreign key. Structured Query Language: Data Definition Language, Data Query Language and Data Manipulation Language, Introduction to MySQL: Creating a database, using database, showing tables using MySQL, Data Types: char, varchar, int, float, date Data Definition Commands: CREATE, DROP, ALTER (Add and Remove primary key, attribute). Data Query Commands: SELECT-FROM- WHERE, LIKE, BETWEEN, IN, ORDER BY, using arithmetic, logical, relational operators and NULL values in queries, Distinct clause Data Manipulation Commands: INSERT, UPDATE, DELETE.	 19. To create student table with the student id, class, section, gender, name, dob, and marks as attributes where the student id is the primary key. 20. To insert the details of at least 10 students in the above table. 21. To display the entire content of table. 22. To display Rno, Name and Marks of those students who are scoring marks more than 50. 23. To find the average of marks from the student table. 24. To find the number of students, who are from section 'A'. 25. To display the information all the students, whose name starts with 'AN' (Examples: ANAND, ANGAD,) 26. To display Rno, Name, DOB of those students who are born between '2005-01-01' and '2005-12-31'. 27. To display Rno, Name, DOB, Marks, Email of those male students in ascending order of their names. 28. To display Rno, Gender, Name, DOB,

			Marks, Email in descending order of their marks. 29. To display the unique section available in the table.
November	Unit 4: Introduct ion to the Emergin g Trends	Artificial Intelligence, Machine Learning, Natural Language Processing, Immersive experience (AR, VR), Robotics, Big data and its characteristics, Internet of Things (IoT), Sensors, Smart cities, Cloud Computing and Cloud Services (SaaS, IaaS, PaaS); Grid Computing, Block chain technology.	• Identify the Emerging trends in the fields of Information Technology.
December	Revision		
January	Revision

SUBJECT – ARTIFICIAL INTELLIGENCE

Month	Unit Name	Chapter Name	Sub-Unit	Learning Outcomes
July	PART-A: Employabi lity Skills	Unit 1: Communicati on Skills-III		Students will be able to Understand meaning and importance of stress management & Apply stress management techniques.
		Unit 2: Self- Management Skills-III		Students will be able to demonstrate impressive appearance and grooming, teamwork skills and apply time management strategies and techniques.
	PART-B – Subject Specific Skills	Unit 1: Introduction To AI	 What is AI? What is Machine Learning What is data? Terminology and Related. Concepts What machine learning can and cannot do. Jobs in AI 	 Students will be able to: Understand what is AI? Difference between conventional programming and machine learning. Structured and Unstructured data. What are the AI products/ applications in society and how are they different from non-AI products/ applications? Different types of machine learning approach. Understand what the jobs that are growing with AI are.
August	PART-A: Employabi lity Skills	Unit 3: ICT Skills-III		Students will be able to create a document, edit the data, change the style of data, adding bullets, word wrap, autocorrect option and printing any document in Word processor.
	PART-B: Subject Specific Skills	Unit 2: AI Applications and Methodologies		 Students will be able to understand: Key Fields of Application in AI. Characteristics and types of AI. Cognitive Computing (Perception, Learning, Reasoning). AI and Society. The Future with AI, and AI in Action. Non-technical explanation of deep learning.
		Unit 3: Math for AI		 Students will be able to: Appreciate the role of mathematics in AI and ML. Linear Algebra, Statistics, Basics of Graphs and Set theory Visual representation of data, bar graph, histogram, frequency bins, scatter plots, etc. With co-ordinates and graphs introduction to dimensionality of data.
		Unit 4: AI Values (Ethical decision making)		 Students will be able to understand: AI: Issues, Concerns and Ethical Considerations Issues and Concerns around AI AI and Ethical Concerns AI and Bias AI: Ethics, Bias, and Trust Employment and AI
September	Revision an	d Half Yearly E	xamination	
October	PART-A: Employabi lity Skills	Unit 4: Entrepreneuri al Skills-III		Students will be able to establish a foundation of confidence in the skills necessary to cause others to act.
